

# Feel Cool XT

## INFRARED REFLECTIVE WATER BASED EXTERIOR EMULSION

### Description

Feel Cool XT is a water based exterior emulsion. The coating system reflects solar heat to having a surface which repels water with a high-water contact angle on the surface of the concrete.

### Features and Benefits

- High Solar Heat Reflectance
- Eco friendly
- Prevents heating up of the interiors
- Ease of application
- Toxicity
- Rated by CRRC

### Application Areas

- Building rooftops
- Industrial shelter tops
- Industrial chemical storage units
- Solvent tanks

### Technical Data

PROPERTIES	RESULTS
Appearance	Pigmented emulsion
Colour	White
Solid content	50-60 wt%
Solar reflective index	109
Thermal emittance	0.89
Water penetration	0 mm @Kpa
Application Method	Brush
Surface dry time, minutes	1 hour
Specific gravity @ 30°C, gms/ cc	1.32
Theoretical Spread Rate(sqft/lt) @ 200 microns DFT	25 *

\*Coverage may vary depending upon texture and porosity of the surface
